

Advantek's B-Series Tri-Laminate Polycarbonate (PC) carrier tape is a specially modified static dissipative polycarbonate material - offering excellent strength and high precision formability. For high speed taping applications, this material economically offers strength, protection and performance comparable to homogeneous polycarbonate materials. It provides the superior formability needed for high precision applications, like bare die, requiring sharp pocket features and flat pocket bottoms.

- > Ideal for high precision designs
- > Suitable for bare die applications
- > Available in standard and cleanroom processing
- > All Advantek carrier tape is manufactured in accordance with current EIA standards
